

BUSHFIRE BOARD - CLARENDON HOMES

SECTOR: Bushfire Protection
PROJECT COMPLETION: Ongoing
ADDRESS: Various

PROJECT OVERVIEW:

Since 2012, Bowers has supported Clarendon Homes through the supply of products used to make homes BAL-FZ compliant to bushfire attack. Additionally, Bowers has installed bushfire protection systems to Clarendon's homes.

SERVICES OFFERED:

Bowers is the exclusive distributor of Promat's exclusive bushfire roof and wall protection systems in NSW. As such, Bowers has supplied and delivered the required materials to various Clarendon Homes and certified the installation.

PROJECT CHALLENGES:

The major challenges with installing compliant BAL-FZ bushfire protection systems is ensuring the client understands the need to choose the correct system. It is a costly venture to undertake and many alternative and cheaper systems claim to be compliant to BAL-FZ requirements, but when closely examined, they are not.

CLIENT: Clarendon Homes
VALUE: \$0.1M+

SOLUTIONS OFFERED:

Promat's systems have been fully tested to the Australian Standards for bushfire protection, AS1530.8.1-2007 and AS 1530.8.2 - 2007 and are guaranteed to provide the required protection. As the exclusive distributor of Promat's bushfire roof and wall systems, Bowers offers the best system on the market to protect homes subject to bushfire "flame zone" risk.

OVERALL OUTCOME:

Bowers can supply the product, install the product and certify the product - or any combination of these. Their flexible approach to this system has meant they have supported Clarendon Homes in the area of Bushfire Protection construction since 2012 and continue to do so.

“Bowers have been of great help on the supply, installation and certification of their bushfire protection products.”
