

SYDNEY FOOTBALL STADIUM, FIRE SEALS

Driver Ave, Moore Park, Sydney

SECTOR:

Building (Stadium)

PROJECT COMPLETION:

May 2021

ADDRESS:

Driver Ave, Moore Park,
Sydney

CLIENT:

John Holland

PROJECT OVERVIEW:

The new state-of-the art 42,500-capacity Allianz Football Stadium located in Sydney's Moore Park, recently opened with much fanfare and celebration. Bowers were engaged towards the latter part of construction to conduct an audit on fire sealing service penetrations and provide relevant solutions where applicable.

SERVICES OFFERED:

Bowers audited the fire sealing of electrical and hydraulic services to ensure they met the Australian Standards.

PROJECT CHALLENGES:

As construction of the Stadium was in its latter stages, Bowers had to work within very tight deadlines to ensure rectification works did not impede with overall construction and the venue's launch date. After pricing the scope of works, Bowers had a highly experienced team onsite diligently working, 24 hours later.

SOLUTIONS OFFERED:

As leaders in Passive Fire Protection, Bowers was engaged as the 'experts' to do the more complex and multifaceted fire sealing service penetrations. Bowers 50+ years' experience and quality team, allowed them to prioritise client deadlines and meet building design and BCA requirements.

OVERALL OUTCOME:

Bowers' experience in fire seals in a stadium environment, ensured the best solution for the client, which was completed on time and on budget. This resulted in a very successful project outcome.
