

## Weather Defence 2 (WD2) Board – Bushfire Roof Protection System

### Fire Safety Measure

Construction of buildings in bushfire-prone areas (BAL-FZ)

### Standard of Performance

NCC 2019 Vol. 2 Amendment 1 Part 3.10.5

AS1530.8.2 (2007)

AS3959 (2018)

### 2026 Information (price on application)

Item no.	Description	Unit
1	Supply - 12.5mm WD2 Board Sheet Size = 2400x1200 (33.7kg per sheet)	per sheet
2	Supply – Selleys Fireblock XT Package size = 600ml sausage	per sausage
3	Supply – Ridge and Valley Angle (L angle size = 35x35x0.55mm @2400)	per angle
4	Supply – Roof Lining Jointer (Z angle size = 60x13x60x0.55mm @2400)	per angle
5	Installation	per project
6	Certification	per project
7	Delivery	

Bowers Bushfire Roof Protection System readily meets the compliance criteria as set out in AS3959 (2018). Our system has also been successfully tested to comply with AS1530.8.2 (2007) for use in flame zone (FZ) areas. These tests were undertaken to ensure that we offer a premium roof system to protect structures located in flame zone (FZ) areas throughout NSW. In other States & Territories AS3959 (2018) offers a “Deemed to Satisfy” (DTS) provision whereby substitution of products is accepted, however this substitution is not recognised within NSW building regulations for flame zone (FZ) regions where products are required to be tested to AS1530.8.2 (2007).

Bowers offer a full compliance solution ranging from Supply Installation & Certification, Supply & Certification, or Supply only. Our certification inspections are undertaken by one of our accredited Competent Fire Safety Practitioners (CFSP) and we offer a minimum of (2) site visits comprising of the following:

- 1st Visit – Prior to installation commencing for discussion of technical requirements with the builder / Installer.
- 2nd Visit – Inspection of completed install to certify to AS1530.8.2 (2007).

A Statement of Compliance will be provided upon the successful and compliant installation of the Bushfire Roof Protection System to AS1530.8.2 (2007). This certification offers peace of mind to the homeowner.
